

MAGIC - Progress to date

Z.A.Pondor, Dr R.Donne

03/04/19

Who we are

- Dialysis population: 550 (HD 430, PD 120)
- Prevalent access: 75% (HD 68%)
- 2 VA clinics alternate weeks
- 2 dedicated VA lists per week
- 2 angioplasty lists once a week
- De-clotting service by MRI

Where we are now?

- MAGIC at 1 satellite unit
 - n = 93
 - prevalent access 76%
- 1st meeting with the whole team
 - HD nurses, unit manager, matron, service manager, medics, patient, access nurses
- Aim for monthly meeting
- 1st process mapping done
- 2 PDSA
- Monthly measurements commenced January 2019

challenges

- Staff unable to attend QI study day
- Collection of data Re: infection is not robust
- PREM question is confusing

What are we proud of?

- Good support from senior colleagues to support MAGIC
- Consultant are in favour
- HD nurses have accepted this QI project
- Diversity of members involved in MAGIC
- Commenced 1st process mapping
- Commenced 2 PDSA

Whatever the unit want to share?

- What do we want to achieve?
 - Better needling practice
 - Improve education of staff
 - Reduce loss of precious access for our patients
 - Maintain high standards of care and improve patient experience
 - Improvement to our EPR
 - Improve prevalent access
- To share
 - Process mapping
 - Having a patient in the group for process mapping
