Creativity

Ranjit Klare
KQuIP Programme Manager

**‘THINK
KIDNEYS’**

KQuIP

Who thinks they are

creative?

Creativity...

The connecting and rearranging of knowledge — in the minds of people who will allow themselves to think flexibly — to generate new, often surprising ideas that others judge to be useful.

Creativity is a great motivator because it makes people interested in what they are doing.

Creativity gives hope that there can be a worthwhile idea.

Creativity gives the possibility of some sort of achievement to everyone.

Creativity makes life more fun & more interesting.

Edward de Bono

The way to get good ideas is to get lots of ideas and throw the bad ones away.

Linus Pauling, Nobel Prize winning chemist

Group Activity ... Be creative

Boris Johnson has passed a new law, from 31st October 2019 each renal unit will receive £1 million if they evidence patient involvement in quality improvement.

How are you going to involve your patients in your QI? (30 minutes to discuss with 10 mins sharing ideas)

Think about:

Locally – support groups/ KQuIP meetings/ unit team meetings
Regionally – Future events/ steering groups
